THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

J. H. Lambright

Whereas, THERE HAS BEEN PRESENTED TO THE
Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF *seventeen* YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. IN THE UNITED STATES SEED OF THIS VARIETY (1) SHALL BE SOLD BY VARIETY NAME ONLY AS A CLASS OF CERTIFIED SEED AND (2) SHALL CONFORM TO THE NUMBER OF GENERATIONS SPECIFIED BY THE OWNER OF THE RIGHTS. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

COTTON

'Lambright GL-4'

In Testimony Whereof, I have hereunto set
my hand and caused the seal of the Plant
Variety Protection Office to be affixed
at the City of Washington, DC
this 10th day of June in
the year of our Lord one thousand nine
hundred and seventy-four

Attest:

L. J. Rollin
Commissioner
Plant Variety Protection Office
Grain Division
Agricultural Marketing Service

Earl L. Butz
Secretary of Agriculture

APPLICATION FOR PLANT VARIETY PROTECTION CERTIFICATE

INSTRUCTIONS: See Reverse.

1. VARIETY NAME OR TEMPORARY DESIGNATION Lambright GL-4	2. KIND NAME Upland Cotton	FOR OFFICIAL USE ONLY PVPO NUMBER 72092	
3. GENUS AND SPECIES NAME Genus Gossypium	4. FAMILY NAME (Botanical) Gossypium Hirsutum L.	FILING DATE 2.22.72	TIME 3 P.M.
6. NAME OF APPLICANT(S) J.H. Lambright	5. DATE OF DETERMINATION Year 1969	FEE RECEIVED \$ 750.00	CHARGES
9. IF THE NAMED APPLICANT IS NOT A PERSON, FORM OF ORGANIZATION: (Corporation, partnership, association, etc.)	7. ADDRESS (Street and No. or R.F.D. No., City, State, and ZIP Code) Route 2, Slaton, Texas 79364		8. TELEPHONE AREA CODE AND NUMBER 806-996-2866
10. STATE OF INCORPORATION		11. DATE OF INCORPORATION	

12. Name and mailing address of applicant representative(s), if any, to serve in this application and receive all papers:

13. CHECK BOX BELOW FOR EACH ATTACHMENT SUBMITTED:

- ☒ 12A. Exhibit A, Origin and Breeding History of the Variety (See Section 52, P.L. 91-577)
- ☒ 12B. Exhibit B, Botanical Description of the Variety
- ☒ 12C. Exhibit C, Objective Description of the Variety
- ☒ 12D. Exhibit D, Data Indicative of Novelty
- ☒ 12E. Exhibit E, Statement of the Basis of Applicant's Ownership

The applicant declares that a viable sample of basic seed of this variety will be deposited upon request before issuance of a certificate and will be replenished periodically in accordance with such regulations as may be applicable. (See Section 52, P.L. 91-577).

14A. Does the applicant(s) specify that seed of this variety be sold by variety name only as a class of certified seed? (See Section 83(a), P.L. 91-577) (If "Yes," answer 14B and 14C below.) ☒ YES ☐ NO

14B. Does the applicant(s) specify that this variety be limited as to number of generations? ☐ YES ☒ NO

14C. If "Yes," to 14B, how many generations of production beyond breeder seed?

Applicant is informed that false representation herein can jeopardize protection and result in penalties.

The undersigned applicant(s) of this sexually-reproduced novel plant variety believes that the variety is distinct, uniform, and stable as required in Section 41 and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act (P.L. 91-577).

(SIGNATURE OF APPLICANT)

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$50.00 fee to U.S. Dept. of Agriculture, Consumer and Marketing Service, Grain Division, Hyattsville, Maryland 20782. Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- 5 Insert the date the applicant determined that he had a new variety.
- 12a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 12b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 12c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 12d Provide complete data indicative of novelty. Seed and plant specimens may be submitted and seeds submitted may be sterile. Where possible, include photographs of plant comparisons, chemical tests, etc.
- 12e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

Exhibit A, Origin and Breeding History of the
Lambright GL-4 Cotton Variety

The Lambright GL-4 cotton is a glandless (Gossypol free) variety, that has been developed by use of a back cross breeding program, from a cross made in 1966, by J.H. Lambright, by using the Lambright X-15-4 normal glanded variety, and glandless pollen from the Texas Agricultural Experiment Station at Lubbock Texas, The Lambright X-15-4 was developed from a cross made in 1964, by J.H. Lambright, by using the Del Cerro and the Lambright 123 BR-1 cottons, the Lambright 123 BR-1 being an upland short staple stormproof, and the Del Cerro being a longer staple loose lock cotton.

The Lambright 123 BR-1 showed Bacterial Blight resistance to all 4 Races of a mixture of Race 1, Race 2, and Variant 5, Variant 6, of Xanthomonas Malvacearium, conducted at the Texas Agricultural Experiment Station at Lubbock Texas in 1965.

By using the facilities at Iguala Mexico for winter increase allowing two generations each year for selection and reproduction, with the 1968-69 winter increase when 5 units or 75 plants were individually harvested, and all plants were free of gossypol glands, with the 1969 increase is when I first determined I had a glandless (Gossypol free) plant.

Exhibit B, Botanical Description of the
Lambright GL-4 Cotton Variety

The special Botanical characteristics of the Lambright GL-4 variety, are the absence of the lysigenous, pigmented, gossypol bearing glands. Having only glandless bearing genes, the seed and plants are glandless, as they pass through the seedling, flowering, and fruiting stages. The Lambright GL-4 cotton are annual plants of intermediate height, with occasional vegetative branching, of the smooth leaf class, (glabrous), the flowers are medium in size, 5 petals, and borne singly, foliage light, the corolla and pollen are light cream, or creamy yellow in color, short jointed 1 to 5 boll fruiting branch, creating a cylindrical or conical form. The fruit is medium to large in size, 4 and 5 locks, The seed are medium to large in size, short ovate in shape, coated with a greenish brown linters, The Lambright GL-4 cotton being of the homozygous genotype, with only the recessive genes, $gl_2gl_2gl_3gl_3$ genes present, which are glandless bearing genes only, the seed and all parts of the plant are free of gossypol glands, throughout the growing period, in comparison to, The parent plant the Lambright X-15-4 variety, being of a normal glanded genotype, with the $Gl_1Gl_1Gl_2Gl_2Gl_3Gl_3$ genes present which are the gossypol bearing genes. With the phenotype expression and the presence of the pigmented gossypol bearing glands in all parts of the plant, which are obvious and easily noticeable throughout the growing period.

Exhibit C, Objective Description of the
Lambright GL-4 Cotton Variety

The Lambright GL-4 is a glandless variety, of intermediate height, medium size main stem, incline to lean under heavy fruiting, with determinant type growth, an occasional basal vegetative branch, early maturity, of the smooth leaf class, (glabrous), foliage light, good root system, medium size 3 to 5 lobe leaves, lighter green in color, the flowers are medium in size, 5 petals, and are borne singly, the corolla and pollen are creamy or light creamy yellow in color, (as are most commercial varieties), short jointed 1 to 5 boll fruiting branches, creating a cylindrical or colical form, The fruit is medium to large in size, 4 and 5 locks, round to round ovate in shape, with a short beak, 60 to 65 bolls seed cotton per lb., stormproof, lint percent 38 to 40 percent, The typical range of fiber properties are, lint length, 1 1/16 to 1 5/32 inches, P.S.I. 90,000 to 100,000 lbs., and micronaire reading of 4.0 to 4.5, Medium to large seed, short ovate in shape, 3,400 to 3,600 to lb., coated with a greenish brown linters.

110 to 115 days to maturity.

The GL-4 cotton has been developed for once over stripper type harvest, not suitable for spindle picking.

Has minimum amount of tolerance to Verticillium and Fusarium wilt, with a high degree of tolerance to Bacterial Blight.

Exhibit D

Data Indicative of Novelty

Application No. 72092 cotton, 'Lambright GL-4'

Lambright GL-4' is most similiar to 'Lambright X-15-4', its glanded parent, including its fruiting habits, compact plant, short joints, and fiber properties, and in its resistance to bacterial blight, race 1 and 2, it starts blooming 5 to 7 days earlier, and has 1.5 higher lint percent. Lambright GL-4' is novel by differing from Lambright X-15-4, in that the plants and seed are free of gossypol, the plants are 4 inches shorter and are inclined to lean, in contrast to being erect in Lambright X-15-4. Lambright GL-4, has virescent yellow leaves, wheras Lambright X-15-4 has dark green leaves.

J.H. Lambright
